PRODUCT INFORMATION

SB-AW Noise Vibration Reduction Mat

Rubber's sound-absorbing characteristic allow Noise and Vibration Reduction Mat to filter off a decent number of unpleasant noises, which help to provide a better environment with lesser noise pollution.

SB-AW Noise and Vibration Reduction Mat shields industrial machinery from rigid floors. Rubber padded mats protect warehouse and factory floors from heavily vibrating machinery. Rubber and Vibration Reduction Mats are elastic enough to absorb impact while resilient enough to withstand abuse. For these properties, rubber is widely used for flooring in many kinds of applications beyond industrial vibration mats.
