PRODUCT INFORMATION

SB-AW Light Duty Earth Anchor

SB-AW Light Duty Earth Anchor is a geotechnical anchor designed for holding tensile loads. SB-AW Earth Anchors are a revolutionary anchoring technology providing time and labour-saving installations of anchored solutions. Working like toggle bolts in soil, SB-AW Earth Anchors are driven to their required depth after which an upward pull on the anchor tendon rotates the anchor head in the ground into a perpendicular anchor locked position. **When using a SB-AW Proof Tester for anchor locking the earth anchor is simultaneously tested to the desired holding capacity allowing for an anchor installation of known holding capacity which is ready for immediate use**.

Product Benefits

- Instant Point of Anchoring.
- Fast, easy and reliable installation.
- No digging or excavation required.
- Superior holding capacity.
- No Soil Disturbance.
- Proof Tested During Installation.

Applications

SB-AW earth anchors are used for erosion control.

Installation Instructions

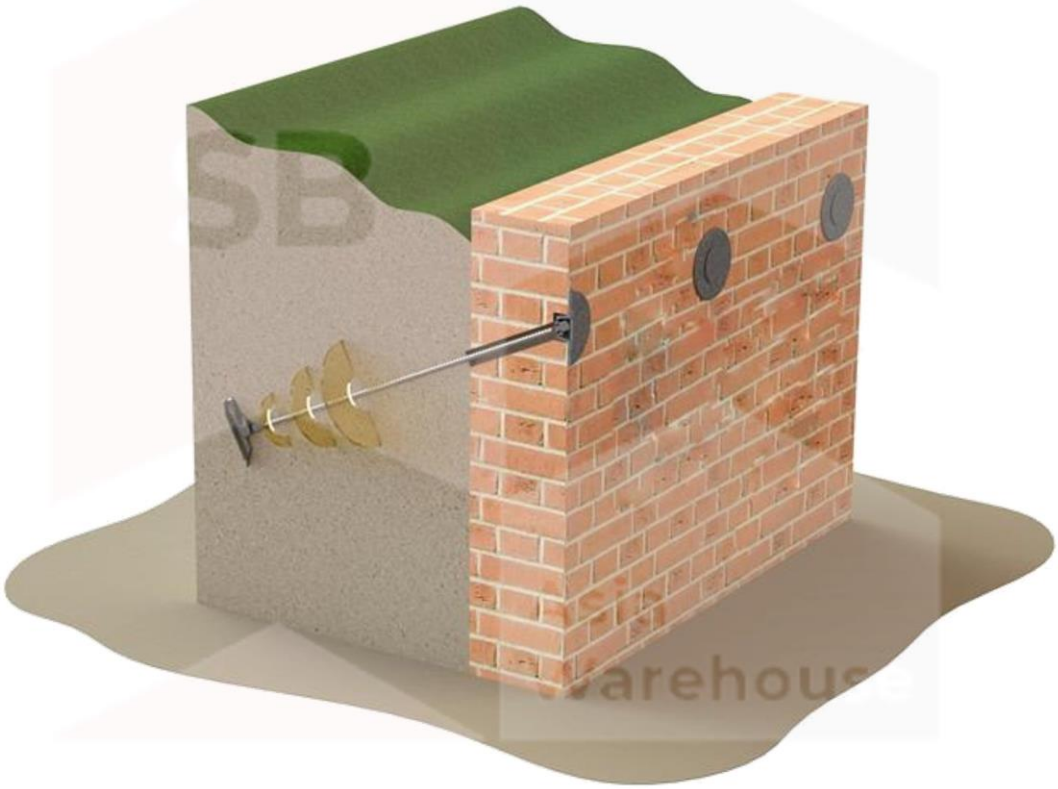

- **Drive the SB-AW Earth Anchor:**
  Using readily available conventional tools and equipment, drive the SB-AW Earth Anchor into the ground with a reusable SB-AW Smasher Rod.
- **Remove the Smasher Rod:**
  Once the SB-AW Earth Anchor is driven to the required depth remove the SB-AW Smasher Rod.
- **Proof Test:**
  Anchor Lock the SB-AW Earth Anchor while simultaneously proof testing to the required capacity.
