

PRODUCT INFORMATION

SB-AW Canvas Tarpaulin

SB-AW Canvas Tarpaulins are used in many ways to protect properties, vehicles and things from wind, rain, and sunlight. They are used during construction or after disasters to protect partially built or damaged structures, to prevent mess during painting and similar activities, and to contain and collect debris.

Tarpaulin is a large sheet of strong, flexible, water-resistant or waterproof material, often cloth such as canvas or polyester coated with polyurethane or made of plastics such as polyethylene.

Specifications

Material: PE

Features:

1. Double-sided with water-resistant: Produced at high extrusion temperatures, the PE material is heat-sealed with uniform texture to ensure that no water leakage.
2. Tightly woven with tear-proof quality: Welded wire mesh plastic made, tightly woven with sheen colours. Highly durable.
3. PE coated design: Using PE synthetic material as surface, comes with water resistant quality.

NOTE: This product can be custom-made based on your requirements. For more information on size, colour and materials, please contact us today!
