

PRODUCT INFORMATION

SB-AW Road Barrier

Plastic barriers are hollow plastic structures that are formed from polyethylene. They are manufactured to be lightweight and portable, some gaining additional strength and stability from being filled with water or sand once they are onsite. They are effective for traffic control on highways and around work sites.

We have different type of road barrier, to suit your needs.

Specifications

Material: High-density polyethylene

Dimension: 1500mm / 1800mm / 200mm x 1000mm x 50mm x 300mm

Weight: 9kg approx.

Features:

1. **High Quality Material:** Made of high-density polyethylene with imported high quality colour mix to ensure durability, ability to withstand extreme weather.
2. **Water and Sand Injection:** Very good cushioning flexibility after water or sand filled, high absorption on strong impact.
3. **Unique Arched Design:** High resistance on weight and pressure impact ensued from arched base design.
4. **Seamless Design:** The entire product is design in one piece with smooth surface for longevity.
